TODO-APP

1. GETTING STARTED

GITHUB REPO: https://github.com/sowmya-520/todo-app
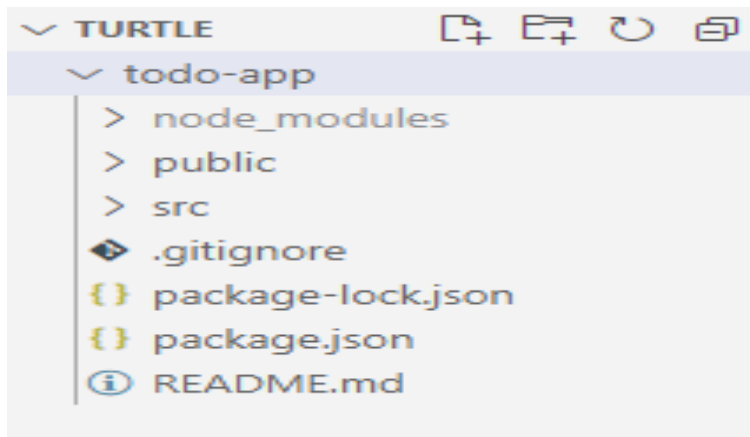

1. Create a folder and open visual studio.

2. Run the command

```
PS D:\turtle\todo-app> npx create-react-app todo-app
```

```
∨ TURTLE
  ∨ todo-app
    > node_modules
    > public
    > src
    ◆ .gitignore
    {} package-lock.json
    {} package.json
    ⓘ README.md
```

3. Install all the dependencies

```
"dependencies": {
  "@reduxjs/toolkit": "^2.2.1",
  "@testing-library/jest-dom": "^5.17.0",
  "@testing-library/react": "^13.4.0",
  "@testing-library/user-event": "^13.5.0",
  "axios": "^1.6.7",
  "react": "^18.2.0",
  "react-dom": "^18.2.0",
  "react-redux": "^9.1.0",
  "react-router-dom": "^6.22.1",
  "react-scripts": "5.0.1",
  "redux": "^5.0.1",
  "web-vitals": "^2.1.4"
},
```

5. As per the given requirements, I created pages and slicers using react redux tookit.
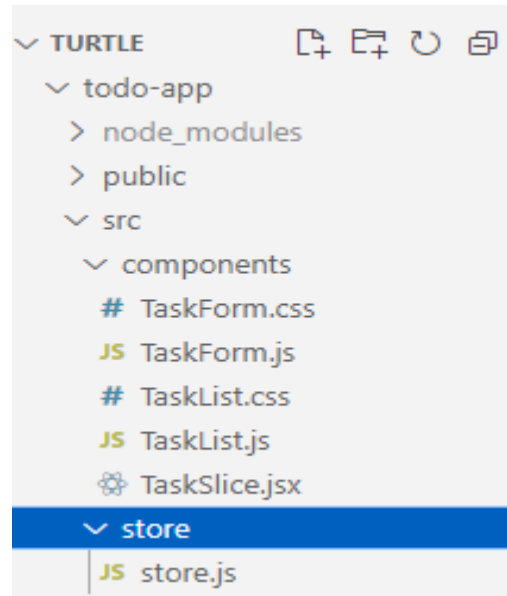

6. Now , configure the store and app.js file.

7.Run the application by using the command

```
One of your dependencies, babel-preset-react-app, is importing the
Compiled successfully!

You can now view todo-app in the browser.

  Local:            http://localhost:3000
  On Your Network:  http://192.168.1.15:3000

Note that the development build is not optimized.
To create a production build, use npm run build.
```
